Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This is the second Office Action for application serial number 10/600,346, Mirror Base filed on June 23, 2003. Claims 1-11 and 13-16 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 9-11 and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,998,814 to Perry. The present invention reads on Perry as follows: Perry teaches a mirror base (14) comprising a mount piece (31-34, 50, 52) and a support piece (40a, 60a-c). The mount piece is to be mounted on a car. The support piece projects from the mounting piece and adapted to support a mirror body. The mount piece and the support piece being integrally made of a resin. A reinforcing core member (36) separately formed from the mount piece and the support piece. The reinforcing core member comprises a continuous flange formed in a marginal region of the reinforcing core member buried inside across the mount piece and the support piece. The core member is provided with a rib (40a, b, 41a, b) for enhancing flexural rigidity of the support piece relative to the mount piece. The core member is provided with a mounting portion (50) bordering a mounting surface of the mount piece to be mounted on the car. The mounting portion is a mounting nut portion. The mounting portion is a mounting bolt portion (28).

Art Unit: 3632

Regarding claims 13-16, the limitation "said core member is comprised of a pressed product" is a mere product by process limitation, which would not be expected to impart distinctive structural characteristics to the mirror base.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perry in view of U.S. Patent No. 6,516,741 to Sorum. Perry teaches the limitations of the base claim, excluding the mounting portion is a mounting bolt portion. Sorum teaches a mounting portion (100) having mounting bolts attached thereto for attaching to surface through apertures on the body. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the mounting nuts and bolts as taught by Perry to have incorporated the mounting bolts and nuts as taught by Sorum, as a mere substitution of functional equivalent parts for the purpose of attaching one object to another. Instead of the nut being attached to the mounting piece the bolts would be attached to the mounting piece.

Response to Arguments

Applicant's arguments with respect to claims 1-11 and 13-16 have been considered but are moot in view of the new grounds of rejection.
